Chemiplastica Acquires the Assets of PA Resins of Perstorp, Sweden

LUGANO, SWITZERLAND – Chemiplastica Group of companies announced today that they have acquired the assets of PA Resins AB of Perstorp, Sweden.

Established in 1961 by Perstorp AB, PA Resins AB is a global manufacturer and marketer of Phenolic, Epoxy, Urea and Melamine resins in liquid and powder forms; and with annual revenue of 30 million Euros, this specialty chemical business unit serves the following end-use markets:

- Laminates
- Foundry
- Flooring
- Abrasives
- Foam Insulation

“This acquisition is another significant step by Chemiplastica towards diversification and will complement our current activities in specialty resin and molding compound manufacturing,” Chemiplastica CEO Claudio Colombo said. “It will also bring to us significant top-line growth and allow us to take advantage of additional synergies across the group.”

The new company named Chemiplastica Resins AB will continue to operate from the existing facility at Perstorp Industripark which provides many of the key raw materials as well as excellent logistic and infrastructures for the operation.

Chemiplastica is a manufacturer and marketer of specialty resins and thermoset molding compounds, with production facilities around the globe.
